

## Mathematics Teacher

We are in search of an excellent Math teacher for 2018-19 to teach at the Humanitas Academy of Art and Technology (HAAT) on the Esteban Torres Community Schools complex in East LA. **This position is available to candidates who hold a Single Subject Math credential.**

The Humanitas Academy of Art and Technology is an LAUSD pilot school, founded in 2010. Pilot schools (though still LAUSD schools) have significant autonomy from the district in the areas of curriculum/instruction, governance, budget, and calendar/scheduling. This makes our school an exciting place to work - we are free from many of the constraints that make LAUSD challenging. Teachers work together to create their own curricular-based periodic assessments whose results drive instruction. The school is small (410 students total in grades 9-12), teacher-designed, and highly collaborative with many opportunities for teacher leadership. Humanitas interdisciplinary teaching is the driving instructional model and our students are heterogeneously grouped. We are committed to building a positive, inclusive community using Restorative Justice principles and practices. We run a full inclusion program, where special education teachers co-teach and collaborate with general education teachers in the instruction of all students, including students designated RSP and SDP.

The WASC Accreditation team described HAAT as “an innovative school...that models the best practices of 21st century teaching and learning.” Visual arts play a strong role in our school. Visit our website to see more <http://haateastla.org>. Our school provides take-home laptops for every student; we have a high level of technology integration in many of our classes.

Our math classes develop a “mathematical mindset” by using an inquiry approach that emphasizes math practices as well as procedural proficiency. The ideal math teacher will join a team that is focused on leading students to self-assess their own mastery on mathematical concepts and skills using a growth mindset. All classes take advantage of the laptops to enhance instruction by integrating various technology platforms including Desmos activities, 3 Act Lessons, Geometer's Sketchpad, and Geogebra.

Please note if you have a background in science and/or science education. Please also note any Spanish language skills and include information about your level of fluency.

If you are interested in working in a pilot school and enjoy working collaboratively with your colleagues this is the school for you. To apply, please email a cover letter and resume, as soon as possible, to:

Deborah Lowe, Principal
